Carpal Tunnel Syndrome Prevention: Neurologists recommend alternating instrument handle sizes as one means of reducing stress. Larger diameter handles (#6, #7, #C8 and #9) help lighten instrument grasp. Using a combination of various handle sizes plus a more relaxed grasp can help lessen the severity of the symptoms of Carpal Tunnel Syndrome.

STAYS SHARPER LONGER
The revolutionary stainless steel alloy is super-durable and stays sharper longer so the clinician can spend less time sharpening.

PROPRIETARY PROCESS
Our proprietary processing ensures that the superior edge retention and wear characteristics of EverEdge Technology will last the entire life of the instrument. Since EverEdge is not a superficial coating, the instruments can be resharpened like any other scaler.

DIAMOND KNURL
The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

COMFORT ZONE CONE WITH SIGNATURE SERIES GRIP
The cushioned grip provides a smooth transition and increased comfort. With distinctive Ocean Blue grips, EverEdge scalers can be easily identified in a set up.

FINELY-HONED FINISH
EverEdge Scalers feature a hand-crafted finish from Hu-Friedy’s professional artisans that keeps edges effectively sharp and allows for efficient scaling.

“As an educator, I always recommend Hu-Friedy’s EverEdge instruments to my dental hygiene students. When well maintained, they can be sharpened so quickly and easily. A real advantage of the fine sharp cutting edge is less hand fatigue for the hygienist and better comfort for the patient, so both the clinician and patient can feel the benefits of EverEdge.”

— JILL NIELD GEHRIG, RDH, MA
Dean Emeritus, Division of Allied Health

“Throughout my career, I was always the delegated instrument sharpener. I accepted this role eagerly because I knew how important it was for the patient and for the clinician to use a sharp edge during instrumentation. Life is too short and your clinical day is filled with important obligations, the EverEdge is a lifesaver.”

— CHERYL THOMAS, RDH
### HANDLE OPTIONS

If the instrument tip/handle combination you desire is not shown, we will be glad to provide you with a quote for its preparation. Instrument tips and handles are not sold separately.

SICKLE SCALERS

Designed for the removal of supragingival calculus

H6/H7
Hygienist
SH6/79
Handle options: #2, #4, #6, #7, #C8, #9
Super-thin, contra-angle design is for interproximal areas. Shank angulation provides accessibility to all anterior and premolar surfaces.

H5/33
Hygienist-Jacquette
SH5/339
Handle options: #2, #4, #6, #7, #C8, #9
Super-thin sickle scaler combined with a straight sickle blade. For scaling interproximal and cervical areas of anterior teeth.

H5/U15
Hygienist-Towner
SH5/U156
Handle options: #2, #4, #6

6/7
Goldman
SHG6/77
Handle options: #2, #4, #6, #7
Shortened blade version of H6/H7.

U15
Towner
SU157
Handle options: #24, #6, #7

U15/30
Towner-Jacquette
SU15/309
Handle options: #2, #4, #6, #7, #C8, #9

U15/33
Towner-Jacquette
SU15/339
Handle options: #2, #4, #6, #7, #C8, #9

PERIODONTAL SET-UP KIT WITH IMS CASSETTE
Recommended to combine scalers, curettes and diagnostic instruments based on your needs.
See also IMS Section - A6.
NEVi® SCALERS

Nevi 1  
Anterior  
SCNEV19  
Handle options: #6, #7, #C8, #9  
An elongated disk end for anterior lingual stain and calculus removal paired with a super thin, anterior curved sickle.

Nevi 1/H5  
Anterior  
SNEV1/H59  
Handle options: #6, #7, #C8, #9  
An elongated disk end for anterior lingual stain and calculus removal paired with a larger H5 sickle – a thin curved blade for interproximal and cervical anterior areas.

Nevi 2  
Posterior  
SCNEV129  
Handle options: #6, #7, #C8, #9  
A super thin posterior curved sickle scaler, the unique contra-angle design is great for interproximal reach and ergonomic hand positioning.

Nevi 3  
Posterior  
SCNEV139  
Handle options: #C8, #9  
Ultra slender, dual cutting blades provide effective placement in tight, narrow contacts and interproximal areas and precise access for effective removal of light-to-moderate deposits.

Nevi 4  
Posterior  
SCNEV149  
Handle options: #C8, #9  
Tapered dual cutting blades provide precise access for effective deposit removal and increased shank rigidity provides for effective removal of burnished, heavy and tenacious deposits.
SICKLE SCALERS

JACQUETTE SCALERS

THE STRAIGHT SICKLE SCALER
Two cutting edges on a straight blade that end in a sharp point. (Also known as a Jacquette Scaler)

THE CURVED SICKLE SCALER
Two cutting edges on a curved blade that end in a sharp point

### SCALER/CURETTE SETS

#### GOLDMAN-FOX SET

- **GF-1 Universal Scaler**
  - **SGF16**
  - Handle options: #4, #6
  - For removing heavy supragingival and subgingival calculus; useful on proximal surfaces and interproximal areas during periodontal surgical procedures.

- **GF-2 Curette**
  - **SGF26**
  - Handle options: #4, #6
  - Contour design for removal of calculus on anterior teeth and premolars.

- **GF-3 Curette**
  - **SGF36**
  - Handle options: #4, #6
  - Same blade surface as GF-2, but specifically designed for the proximal surface of the posterior teeth.

- **GF-4 Curette**
  - **SGF46**
  - Handle options: #4, #6
  - Additional bend in the shank for easier calculus removal in the molar region.

- **GF-5 Hoe**
  - **Buccal/Lingual**
  - **SGF5**
  - Handle: #4
  - For removing heavy calculus deposits.

- **GF-6 Hoe**
  - **SGF6**
  - Handle: #4
  - For mesial/distal surfaces of the posterior teeth or facial/lingual surfaces of the anterior teeth.

- **GF-21**
  - **SGF21**
  - Handle Options: #4, #6
  - Sharp spoon on one end is for debridement in curettage procedures. Small scaler on the other end can be used with either a circumferential or vertical stroke.

- **GF-21S/33 Combination**
  - **SGF21S/33**
  - Handle Options: #2, #4
  - Small end Goldman-Fox scaler with a #33 straight miniature Jacquette scaler.

#### CATTONI SET

- **103/106**
  - **S103/1066**
  - Handle options: #4, #6

- **104/105**
  - **Hoe/Chisel**
  - **S104/1056**
  - Handle options: #4, #6
  - Shorter shank than the S107/108.

- **112/113**
  - **S112/1377**
  - Handle options: #7

- **107/108**
  - **S107/1086**
  - Handle options: #2, #4, #6, #7

- **107/108S Modified**
  - **S107/108S**
  - Handle options: #2, #4

Langer 17/18 for maxillary and mandibular posterior

• After Five and Mini Five terminal shanks are elongated by 3 mm for access into deep periodontal pockets and root surfaces of 5 mm or more.
• Blade is 10% thinner than standard Langer to ease gingival insertion and reduce tissue distention.
• Mini Five has a reduced blade, half the length of the After Five or standard Langer, for better adaptation in narrow pockets and furcations.

LANGER APPLICATION CHART

Langer curettes have the shank design of a Gracey curette combined with a universal blade. These instruments can scale all surfaces.

STANDARD GRACEY CURETTES

- Area-specific to allow for deep scaling, root planing and periodontal debridement
- Offset blade provides a perfect working angulation for the tooth surface
- Offset blade angulation means only the lower cutting edge of each blade is used

SG7/8R9  
Handle options: #2, #4, #6, #7, #C8, #9  
Medium contra-angle for premolars and molars, facial and lingual surfaces

DID YOU KNOW?

Extra Rigid Gracey curettes are ideal for tenacious calculus removal, gross scaling, and initial debridement. Blades, however, are identical in size to standard Gracey curettes.
Long contra-angle for molar buccal and lingual surfaces and a more pronounced angle than 7/8 for less accessible root surfaces.

Angulated to reach mesial surfaces of posterior teeth

Angulated to reach distal surfaces of posterior teeth

Same shank bends as 13/14, but blade positioned to reach mesial posterior surfaces

Accentuated angles improve access to distal posterior surfaces. The 17/18 also has smaller blade and slightly longer terminal shank.

DID YOU KNOW?
The Rigid Gracey has a thicker, stronger, and less flexible shank than the standard Gracey. This allows for removal of moderate to heavy calculus.
# Design Comparisons

Refer to the chart to match instruments with area of application by using the color-coded diagram below.

</table>

*The 17/18 is a unique pattern, having a longer terminal shank and slightly shorter blade.
**AFTER FIVE GRACEY CURETTES**

Designed to adapt to a specific area or tooth surface.

- Terminal shank is 3 mm longer than Standard Gracey
- Longer terminal shank allows better access to deep pockets and areas with recession
- Blade is 10% thinner than standard Gracey curette to allow for less tissue distention when accessing deeper pockets

**MINI FIVE GRACEY CURETTES**

- Terminal shank is 3 mm longer than Standard Gracey
- Compared to the standard Gracey curette, blade is 50% shorter and 10% thinner
- Good for scaling in deep, narrow pockets

FACT
Bio-type based periodontal therapy is growing in awareness amongst clinicians as focus grows around maintaining the integrity and conservation of the patient’s tissue\textsuperscript{1-3}. This therapy provides greater patient comfort and promotes optimal oral health.\textsuperscript{4,5}

CHALLENGE
Patients with thinner gingival biotypes have tissue that is more sensitive to receding and retraction after treatment in addition to altering the aesthetics of the tissue itself.\textsuperscript{2,6-12} *These patients require a biotype-specific approach with instrumentation that is more respectful to the tissue.*\textsuperscript{6,9,13-15}

SOLUTION
The proprietary design of Hu-Friedy BioGent Curettes provides a more tissue-friendly approach. These instruments are slim enough to provide enhanced pocket access.

POINTS OF PERFORMANCE
Evolving periodontal therapy advancements require finishing instruments that provide

- Reduced blade width for non-traumatic and efficient access into the periodontium
- Modified bends and angulation for better adaptation
- All BioGent Curettes are designed with EverEdge Technology for super-sharp edges and efficient scaling

11. Clinical Manual of Periodontology; Section of Predoctoral Periodontology University of Southern California School of Dentistry Compiled by Faculty of Periodontology Version 4.0, January 8, 2009
BIOGENT CURETTES

BIOGENT

- Reduced blade width for non-traumatic and efficient access into the periodontium
- Modified bends and angulation for better adaption
- Color coded for efficient time management
- All BioGent Curettes are designed with EverEdge technology for super-sharp edges and efficient scaling

PERIODONTAL SET-UP KIT WITH IMS CASSETTE
Reccomended kit with Biogent Curettes designed by Drs. Antonella Labriola and Dr. Pierpaolo Cortellini
See page Periodontal Set-ups for more information.
GRACEY MESIAL-DISTAL CURETTES
These combinations of working ends are designed to complete an entire facial or lingual sextant without changing instruments, increasing efficiency.

THE CLAYTON GRACEY STORY
In the late 1940s, an innovative dentist from the University of Michigan had a vision. Clayton Gracey wanted to “give every dentist the possibility to treat even the deepest and least accessible periodontal pockets simply and without traumatic stretching of the gingiva.”

Dr. Gracey brought his idea to Hugo Friedman, the founder of Hu-Friedy, who supported his concept. Together they developed a series of 14 single-ended area-specific instruments for the successful removal of deposits from root surfaces.

Dr. Gracey’s designs laid the groundwork for the new instruments of today. Currently, Gracey curettes are available as double-ended instruments with multiple handle choices.

The Gracey curettes have come a long way since the original design. Hu-Friedy currently manufactures a variety of styles and patterns, such as After Five curettes with a longer terminal shank and thinned blade, Mini Five curettes with After Five features and a shorter blade, and the 15/16 and 17/18 patterns. An optional Rigid shank is available on all of the Gracey designs.

Hu-Friedy is continually looking for new ways to improve our existing products. Our success is dedicated to the pioneers in dentistry, including Dr. Clayton Gracey, who helped to make a vision become not only a reality, but also a part of every dental office today.
RESIN 8 COLORS

Hu-Friedy’s Resin 8 Colors are ergonomic, lightweight and offer a color-coding system based on specific areas of the mouth. Plus, each scaler and curette features Hu-Friedy’s proprietary EverEdge technology, which keeps the working ends sharper longer. See the full list of Resin 8 Colors part codes on page D28.

BUILD UP YOUR KIT WITH IMS CASSETTES

Instruments inside an IMS cassette can be organised according to procedure type.

See the full list of Resin 8 Colors part codes at page D26-D28 and IMS cassettes, see IMS Section - page A6.

SQMD16
Handle options: #4, #6

2 Quétin
Mesial-Distal
1.3 mm
SQMD26
Handle options: #4, #6

3 Quétin
Labial-Lingual Scaler
SQLL36
Handle options: #4, #6

*DID YOU KNOW?
The DeMarco Curettes are excellent for stain removal on anterior lingual surfaces.*

*Designed in consultation with Trisha O’Hehir, RDH.
Scaling with Implacare II caused the least alteration to the abutment surface.
**Hoe Scalers**

Used to dislodge heavy supramarginal calculus deposits
(use a pull stroke)

- **7K**
  - **S7K**
  - Handle: #24

- **XS-15**
  - Towner
  - **SXS156**
  - Handle options: #24, #6
  - For anterior linguals

- **U15/13K**
  - **SU15/13K**
  - Handle: #4

**File Scalers**

Used to crush and remove heavy calculus deposits
(use a pull stroke)

- **10/11**
  - Orban

Handle: #2

DARBY-PERRY CHISELS
SPECIALTY SCALERS

DIAMONDTÉC FILE SCALERS

- The perfect size and shape to enhance definitive scaling in furcations and root depressions
- Double-ended designs allow for more efficient scaling
- Large diameter handle provides an ergonomic grip and helps reduce the symptoms of CTS*
- Signature Series grips make instruments easy to identify
- Diamond coated file scaler

KRAMER-NEVINS CURETTES

- The Kramer-Nevins modified Gracey curette series is designed for root planing and subgingival curettage.
- Features slightly modified blade curvatures, thinner profiles, and extra length to help gain access to difficult areas without losing curette “bite.”
- Most commonly employed during initial pre-surgical preparation, and with all maintenance patients.
- Also extremely useful during surgery.

SIDEKICK SHARPENER

The Hu-Friedy Sidekick sharpener is designed for routine maintenance sharpening of scalers and curettes. Correct routine sharpening helps extend instrument life.

- The Sidekick sharpener is cordless, for use anywhere in the dental office
- Instrument Guide Channels and Vertical Backstops are “template-like” guides that help control blade angulation, providing consistent results
- The Sidekick sharpener is compact and requires minimal space

**Replacement Parts & Accessories**

- Guideplate Screw: SDKGPSCREW
- Guideplate: SDKGPLEATE
- Ceramic Stone: SDKSTONEC
- Coarse Stone: SDKSTCOARS
- Stone Clip: SDKCLIP
- Plastic Test Sticks: PTS
- Magnifying Lens: LENS

**Sidekick Sharpening Kit**

**SDKKIT**

Kit includes:
- Sidekick Unit, User Manual & CD-ROM,
- Ceramic Sharpening Stone, Plastic Test Stick, Magnifying Lens and 2 AA Batteries.

**DIAMOND SHARPENING CARDS**

- A uniform coating of industrial diamonds bonded to high quality stainless steel provides an extremely hard, flat surface for instrument sharpening.
- Durable surface resists grooving and ditching; remains flat after repeated use and will not break or shatter if dropped.
- Easy clean-up via ultrasonic cleaner and steam sterilisation.
- Thin credit-card size shape allows sharpening cards to readily fit into sterilisation pouches or cassettes with procedural set ups.

- Extra Fine Grit Diamond Sharpening Card: DSCXFINE
- Fine Grit Diamond Sharpening Card: DSCFINE
- Medium Grit Diamond Sharpening Card: DSCMED
- Extra Fine, Fine and Medium Grit Diamond Sharpening Cards: DSCSET

SHARPENING STONES

Stones at 50% of size

299 Arkansas Conical Super-Fine Grit®
SS299
3-1/2"x 5/16"
(8.9 x .8 cm) base.
Hard, for sharpening facial surface of curette.

No. 2 Arkansas Cylindrical Super-Fine Grit®
SS2
4" x 1/4"
(10 x .6 cm) For sharpening facial surface of curette.

Ceramic Cylindrical Fine Grit®
SSKC
4" x 5/16"
(10 x .31 cm)

309 I-Stone Fine Grit®
SS309
4" x 1/2" to 1/4" x 1/4" to 1/8"
(10 x 1.3 x .6 x .3 cm) long

File Sharpener Tanged Carbon Steel
FST
4-1/4" (10.8 cm)

Hu-Friedy File Sharpener Carbon Steel
FS
5-1/2" (14 cm) long

Plastic Test Stick
PTS
3" x 1/4"
(7.6 x .6 cm) Available in packages of 6

Luxating Elevator Sharpening Stone Fine Grit®
SSLUX
For use with luxator elevators

Ceramic Stone
SDKSTONE
Medium Grit Ceramic Stone only for the Sidekick sharpener

Dual Grit Stone®
SSDGRIT
Features a coarse ceramic side for recontouring and a light ceramic side for finishing and honing. 4" x 5/8" x 1"

No. 1 I-Stone Fine Grit™
SSF1
4" x 1" x 1/2"
(10 x 2.5 x .6 cm)

No. 3 Ceramic Medium Grit™
SS3C
3" x 1-1/4" x 1/4"
(7.6 x 3.2 x .6 cm)

No. 4 Arkansas Flat Hard Fine Grit®
SS4
4-1/16" x 1" x 3/8"
(10 x 2.5 x .6 cm)

No. 5 Arkansas Bates Hard Fine Grit®
SS5
4" x 1-1/2" x 1/2"
(10 x 3.8 x 1.3 cm)

No. 6 Arkansas Wedge Shape Medium Grit™
SS6
4-1/2" x 1-7/8" x 3/8" down to 1/8"
(11.4 x 4.8 x .9 down to .3 cm)

No. 6A Arkansas Thick Wedge Hard, Fine Grit®
SS6A
4" x 1-7/8" x 3/8" down to 1/8"
(11.4 x 4.8 x .9 down to .3 cm)

AS-22 Arkansas Super Hard Super Fine Grit®
SSAS22
2-1/4" x 7/8" x 3/16"
(5.7 x 2.2 x .5 cm)

MS-22 I-Stone Medium Grit™
SSMS22
2-1/4" x 7/8" x 3/16"
(5.7 x 2.2 x .5 cm)

Plastic Test Stick
PTS
3" x 1/4"
(7.6 x .6 cm) Available in packages of 6

Luxating Elevator Sharpening Stone Fine Grit®
SSLUX
For use with luxator elevators

W: Lubricate stone with water Q: Lubricate stone with oil D: No lubrication needed
LARGE-SCALE INSTRUMENT MODELS
Used to help familiarise students with critical instrument surfaces, designs, and develop a better understanding of their application and maintenance. Models are 12" (30.5 cm) high.

All large scale models are also available in cross section

LARGE-SCALE SHARPENING STONE PLASTIC MODELS

Plastic Test Stick
LPTS
11-1/2"
(29.2 cm)

#4 Sharpening Stone
LSS4
3" x 11" x 7-1/2"
(7.6 x 28 x 19 cm)

ACCESSORIES & KITS

Arkansas Stone Kit
SSKITA
Includes: #4 Flat Arkansas Stone, #299 Conical Arkansas Stone, 5 Plastic Test Sticks, Sharpen-EZ Stone Oil, Magnifying Lens

Ceramic Stone Kit
SSKITC
Includes: #3 Ceramic Stone, Cylindrical Ceramic Stone, 5 Plastic Test Sticks, Magnifying Lens

Sharpen-Ez™ Sharpening Oil
1-oz. Bottle (29.5ml)

SIGNATURE SERIES GRIPS
Signature Series grips can only be used with Satin Steel Colours, EverEdge technology and ResinEight instruments, and are used for identifying and organising instruments. They're useful for maintaining proper instrument order in cassettes and identifying instruments by procedure. Grips will withstand all approved heat sterilisation methods.

All single color packages contain 16 pieces. The assorted color packages contain your choice of either 16 or 80 pieces.

MISCELLANEOUS

INSTRUMENT SHARPENING

Brush Handle 1
HCB1
Used for pit and fissure sealant, acid etch, and placement procedures. Made of Immunity Steel® material to allow sterilisation by autoclave. Design holds most manufacturers’ brush inserts.

Immunity Steel Pumice Cup, Modified
PCUPM
Used to hold prophyl paste or medicaments. Made of corrosion resistant, acid-proof stainless steel.

Immunity Steel Pumice Cup, Modified
MCUPE
25ml
